Subject: RE: Meeting Agenda

Absolutely. Loren Shelley from our Industrial Stormwater Program will be at the meeting and can discuss our MOU and coordination with DEQ Cleanup and Water Quality.

See you in a bit.

Subject: Re: Meeting Agenda

Thanks, Linda. Could we also save some time to discuss the MOU between CoP and DEQ regarding the storm water program and how CoP implements it (i.e., conducts SW inspections, followup, etc.)

It'll just be me in person from EPA. Sean and our contractors will be calling in.

Thanks!

Eva

Subject: Meeting Agenda

Hi All,

Attached is the agenda for our agency source control coordination meeting tomorrow. The agenda is geared toward providing new EPA project managers with some context for the City's Portland Harbor upland work and the agency collaboration on the Outfalls Project. We have a big block of time reserved in the room, so there should be plenty of time for any other issues that you would like to discuss or questions about our program. I am working on some handouts and visual aids that I will post to our ftp site later today or tomorrow a.m. for those who may be calling in. So look for a separate email with a link to the ftp site. Thanks.

Linda
